

Ease your transition back to home.

Opt for the Dispense-to-Home program to have the right medications – and enough medicine to last until you see your doctor.

As the preferred provider of pharmacy services at this community, Symbria Rx Services will fill your prescriptions during your stay here. We can also provide a supply of medications for you to take at home after you are discharged: either a month's supply or enough medication to last until your next appointment with your primary care physician.

When you choose Dispense-to-Home:

- A nurse will show you how to use our strip packaging before you go home. You should not take any medications you may already have at home unless the nurse instructs you to do so.
- If you have any prescriptions that our pharmacy is not able to provide, the nurse will let you know.
- You will need to remove any medication that your primary care physician tells you to discontinue before your next appointment from the strip packaging. If you are unsure about the medication to discontinue, please call our pharmacy for assistance.
- Our pharmacy will bill your insurance plan for your Dispense-to-Home medications. We will mail an invoice to your home address for any co-pays required by your insurance company.

When you receive new prescriptions from your primary care physician, you can simply fill them at the retail pharmacy of your choice and your participation in this program will end.

How to participate

To take part in this program, you will simply need to sign an Assignment of Benefits form and acknowledge receipt of your medications on the last day of your stay.

If you have any questions about Dispense-to-Home, please contact a member of the nursing staff.

You will receive your medications in innovative strip packaging that provides the highest levels of safety.

About Symbria Rx Services

Symbria Rx Services is a well-known and respected pharmacy that specializes in serving the needs of older adults. We provide pharmacy services to thousands of senior-living residents, filling nearly 50,000 prescriptions each month with an accuracy rate that exceeds 99.99 percent.
