

Give your residents the outpatient therapy they need and the convenience they want.

Set your community apart: Offer a complete outpatient rehabilitation program on campus.

Your community can gain a real competitive edge by partnering with Symbria Rehab Outpatient Services to offer on-campus physical, occupational, and speech therapy to your residents. This comprehensive program is designed specifically for older adults and is based on the clinical best-practices foundation pioneered by Symbria Rehab.

A Symbria Rehab Outpatient Services program on your campus delivers tangible benefits:

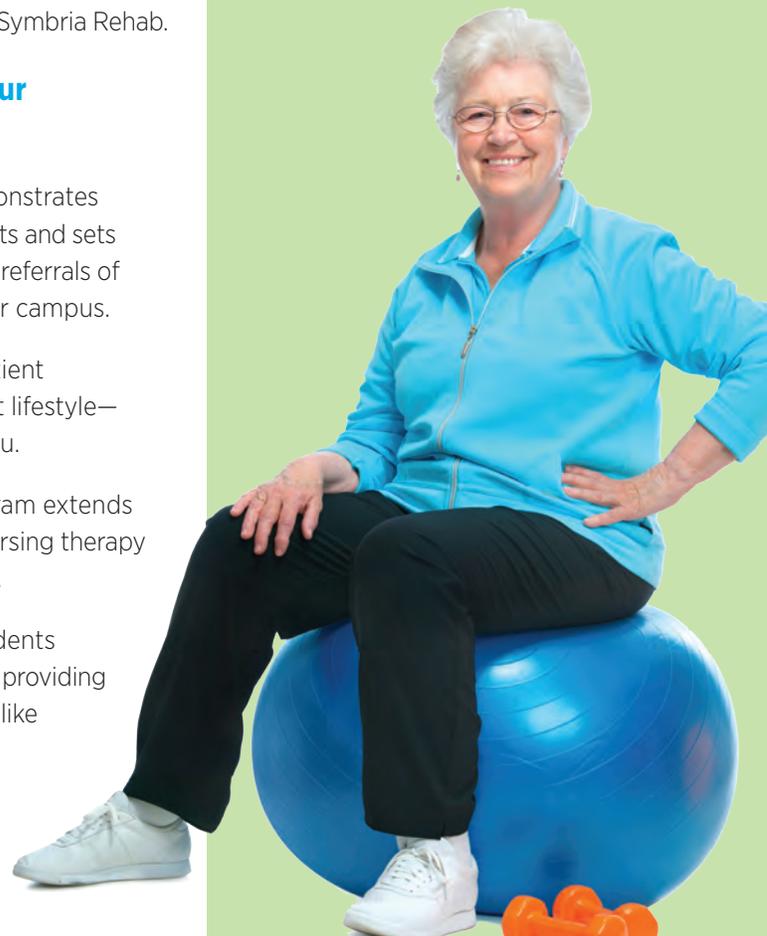

Census growth. An on-campus outpatient therapy program demonstrates a commitment to providing a full complement of services to residents and sets your community apart from your competitors. You also can pursue referrals of seniors from the area and attract potential future residents to your campus.

Resident satisfaction. Eliminate the travel to conventional outpatient providers, contribute to your community's carefree and convenient lifestyle—and keep your residents happier and more likely to recommend you.

True continuity of care. An on-campus outpatient therapy program extends your therapy continuum beyond short-stay rehab or your skilled nursing therapy program and promotes better clinical outcomes for your residents.

Support for aging in place. Our therapy team will help your residents avoid hospital stays and improve their quality of life by treating and providing prevention education for the most prevalent issues and conditions like balance and fall risks, chronic pain, and congestive heart failure.

Symbria Rehab manages more than 60 outpatient clinic programs throughout the country. In a space about the size of a studio apartment, we deliver great outcomes through quality rehab services.

The Symbria Rehab Outpatient Services program includes:

- 1 Physical therapy, occupational therapy, and speech therapy.
- 2 All operational management, including staffing, scheduling, and billing.
- 3 Regulatory and Medicare compliance.
- 4 Specialized clinical programming for the senior population, such as post-surgical orthopedic rehab, neurological rehab, balance programs, incontinence, pain management, and more.
- 5 Outpatient at home: if the resident is unable to come to the therapy gym, our therapists will provide treatment in his or her home.

Symbria Rehab. Forward-thinking teamwork.

Integrity and compassion have always gone hand-in-hand with our commitment to innovative initiatives. Established in 1999, Symbria Rehab now encompasses multiple joint venture partnerships, a growing client base of close to 200 post-acute care and senior-living communities, and a staff of nearly 2,000 therapy and fitness professionals in more than a dozen states.

Distinguish your community as visionary and effective with our integrated approach to rehab and wellness.
